Justdiggit is partnering with GIZ to help introduce and scale Forest Landscape restoration (FLR) practices in Togo, Madagascar & Ethiopia. Justdiggit will support the local implementing team in executing diverse communication approaches to help to scale the impact of the program. The Forests4Future project focuses on the restoration and governance of forests and tree-rich, productive landscapes in Ethiopia, Madagascar, and Togo. Forests4Future Madagascar project contributes directly to the fulfilment of Madagascar's self-commitment under AFR100. The project combines landscape and forest approaches, thus highlighting the special role of forests in rural development in the context of food security.

Diana and Boeny regions: the Forests4Future project aim to use a participatory and integrated approach to restore the ecological and productive functional capacities of degraded forest landscapes and improve the income of the local population through FLR measures and professionalization of value chains as well as to promoting the potentials of rural households and nurseries for increased value addition of agroforestry products.
